

Dear Sir:

My name is Scott Rinehart and I have been a beta tester for the new CapTel phone. It has worked wonderfully for me and will become even more valuable to me in the future. I have a progressive hearing loss and will continue to lose my hearing until it is eventually completely gone. As I lose my hearing, my ability to use a normal telephone becomes less and less. This new Captel phone has provided me with near normal conversation. It has given me freedom to make phone calls without others feeling uncomfortable. Please seriously consider providing funding for this service. I would be forever in your debt. Thank you for your time and consideration.

Scott Rinehart
